This Reading Game will help children to read high frequency words. The child has to read a question, find the card with the corresponding picture and then read the answer / word out loud. The next question at the bottom of this card continues the game. Simply find the card with the picture of that word and continue playing until the last card is drawn. There are 52 cards that the child must go through until the game is over.

Simple and exciting word game can help children become better readers and writers.

### Reading with initial sound picture cards

Instructions for making the cards:

1. Print the cards on white paper. You can also print the cards on thicker paper as thick paper is easier to hold (cardstock works best).
2. Cut out the cards one at a time.
3. Laminate cards individually to make them more durable or to use with dry erase markers.
4. The child can play alone with the support of the parents or in a group with other children.
