## HOW TO QUICKLY MULTIPLY TWO DOUBLE-DIGIT NUMBERS THAT ARE LESS THAN 20? ?

$$13 \times 12 =$$

First, add the second digit from the multiplier with the multiplicand.

$$\underline{13} \times \underline{12} = 15$$

Then, multiply the second digit from the multiplier with the second digit from the multiplicand.

$$\underline{13} \times \underline{12} = 156$$

New example:

$$14 \times 16 =$$

First, add the second digit from the multiplier with the multiplicand.

$$\underline{14} \times \underline{16} = 20$$

Then, multiply the second digit from the multiplier with the second digit from the multiplicand.

$$\underline{14} \times \underline{16} = 20^24 = 224$$
